

TIMBER INTENT  
“SKIPPER”

“Skipper” is a modular, multi-purpose standard structure for schools, colleges, cafes, restaurants, pubs, hotels, visitor centres, gardens etc.

The “Skipper” is suitable for permanent installation into most public spaces. The basic model measures 5m x 5m, covers 25m.sq. and is a multi-functional, flexible structure with many applications. Manufactured in solid round-wood timber and with a proofed cotton canvas membrane it is robust, durable, environmentally friendly and economical. It is available as a single or a double and comes with a choice of corner pole arrangements and can have either stainless ropes or timber pole tie/guys that make it useful for installation in playgrounds.
